School Council - Skateboard Kits Funding Follow-up

Email that was sent:

"The School Council is, in principle, supportive of your proposal. However, there were questions about whether all potential expenses for the project have been accounted for. The Council would like to ensure that you have sufficient funding to cover all necessary items to help sustain this program year after year. For instance, it may be beneficial to include a line item for replacement parts—particularly for the vacuum forming kit component that could require repair. Additionally, please consider whether you have enough materials to fully implement the project.

If possible, could you review your proposal to ensure all required resources are covered, especially for the long-term success and durability of the program? Once revised, please send the updated proposal to me via email."

Response:

Thanks for reaching out!

Sorry it took a bit to reply - I just wanted to talk directly to some pals as well as the supplier while reflecting on your insights.

- 1. Line item for replacement parts—particularly for the vacuum forming kit component that could require repair.
 - Sealing Tape (line 89) is the part that needs regular replacement
 - o Recommended replacement pretty much every time a new set of students comes in (aka every semester)
 - o The roll included will do it about 50 times so should last a while
 - o If the budget allows, an extra roll (\$29.95) would be helpful; that said, this is worked into the per board cost per student as well
 - *Vacuum Bags* (line 84) can be repaired with regular packing tape if accidental punctures happen several repaired holes in the same bag are fine
 - o It sounds like bags last a long time
 - o If one was slashed beyond repair (vandalism which I hope wouldn't happen but anything is possible), there are 4 others in parallel use, so we could keep moving forward while waiting for a replacement
 - Replacement Valve Caps(line 86) are backup in case they get lost not so much an item that breaks
 - o The 5-pack ought to be plenty for a while
 - *Glue Rollers* (line 96):
 - o Reusable and are usually stored in a plastic bag so that glue doesn't have to be cleaned off
 - o This saves glue and they stay good for about 6 months in the plastic bag between uses
 - o If the budget allows, 3 extra rollers ($\$3.95 \times 3 = \12) would be helpful; however, this too would be worked into the per board cost per student for incidentals
 - Foam Molds (line 70) don't typically wear out unless done maliciously
 - They get covered in plain packing tape for protection in case glue or whatever drips onto them
- 2. Consider whether you have enough materials to fully implement the project.

- The plan is for this to offer a solid foundation off of which to build this program
 - Students will generally be charged \$35 per deck which will cover costs
 - With exceptions for students with financial barriers and so on
 - I will order the first round of these materials at the same as this big order to minimize shipping costs
 - Turn around time from placing the order to delivery is one to two weeks depending on how long it takes our school to make payments
 - The materials for 25 decks included here will cover students lacking funds, exemplars/demonstrations, and create an avenue for fund generation to build up a small fund for potential replacement and expansion in the future (longboards, etc)
 - The primary components of this system can be used for molding into things other than skateboard decks like <u>instruments</u> and <u>furniture</u> for which materials can be sourced through <u>Roarocket</u> or elsewhere
- Included are materials for 25+ decks:
 - o 25 Uncut Vaneer sets (line 120): 25 decks
 - o 3 Titebond Glue (line 92): 12 decks per gallon x 3 gallons = 36 decks
 - o 2 60' Grip Tape Rolls (line 123): 21 decks per roll x 2 = 42 decks

I hope that covers it - please don't hesitate to ask more questions!
